

Module 5 - Activity 1: Make a List

Time: 10 to 15 Minutes

Take out your notebook and make two headings: investment and purchases. Next, investigate 10 to 15 other types of cryptocurrencies available and categorise them under one of those two headings. If the currency you choose fits both, write it down under both headings.

Choose currencies that are popular, as well as those we have not yet discussed in this module. This can help increase your exposure to the over 1,300 types of cryptocurrency available, while also learning about their specific purpose.
