

```
#include <ArduinoLowPower.h>

void setup() {
  // put your setup code here, to run once:
  pinMode(13, OUTPUT);
  LowPower.attachInterruptWakeup(RTC_ALARM_WAKEUP, dummyfunction, CHANGE);
}

void loop() {
  // put your main code here, to run repeatedly:

  digitalWrite(13, HIGH);
  delay(500);
  digitalWrite(13, LOW);
  delay(500);

  LowPower.sleep(2000);
}

void dummyfunction()
{

}
```
