

# Steps to Digital Image Creation Framework

Use this framework to help you prepare your thinking and resources for developing the image.

**Plan the image** – What type of image will you create and what will it show?

**Create the image** – What digital tools will you use?

**Enhance the image** - What design aspects need to be considered, such as matching colors. Is there anything you need to add to the image to enhance it further?

**Save it** – What type of file type will you save your image? This could be GIF, PNG, JPEG or other formats.

**Share it** – Make plans to ensure you can share your image in a venue that will gain viewers matching your desired audience.
