

Exercise

Using the code in the "Update - Exercise Starter Code.sql" file in the resources for this section (which is the same as the example presented in the video), update the value in the "OrderSubcategory" field as follows:

The value in the field should consist of the following string values concatenated together in this order:

- The value in the "OrderCategory" field
- A space
- A hyphen
- Another space
- The value in the "OrderAmtBucket" field

The values in the field should look like the following:

[illegible]
