

## **Activity 2: Name Five More Cryptocurrencies**

Time: 10 to 15 Minutes

It is impossible to list each and every cryptocurrency that is available now, since there are so many on the market. We reviewed a few of the most popular and notable types above, in order to give you information on names you may be familiar with and those that are relatively easy to obtain. However, there are numerous start-ups coming onto the market every day. Take about 10 to 15 minutes and create a brief list of five other cryptocurrencies you could purchase. List the date they became available and jot down a few points about the currency.
