

### **Module 3: The Mechanics of Cryptocurrency**

#### **Activity 2: Find a Crypto-Community**

*Time: 10 to 15 Minutes*

Select a type of cryptocurrency. It could be one we discussed in the last module or another one you are interested in learning more about. Spend some time finding ways to acquire more technical and financial information about that currency.

Make use of social media as well as search engines, to locate a few different communities on a variety of platforms. You do not need to engage with this community, but make a note of how you located ones that you may contemplate joining in the future.
