
What are Skills for Success?

The revised skills are now called “Skills for Success” on the Canadian government site.

See: <https://www.canada.ca/en/services/jobs/training/initiatives/skills-success/new-model.html>

Here's a link to the reference site for the revised skill list — the “Skills for Success”:

<https://www.canada.ca/en/services/jobs/training/initiatives/skills-success/understanding-individuals.html>

Here is what the site says about each of the skills:

Adaptability

Your ability to achieve or adjust goals and behaviors when expected or unexpected change occurs, by planning, staying focused, persisting, and overcoming setbacks. For example, we use this skill to change work plans to meet new deadlines, learn how to work with new tools, and improve our skills through feedback.

Collaboration

Your ability to contribute and support others to achieve a common goal. For example, at work, we use this skill to provide meaningful support to team members while completing a project.

Communication

Your ability to receive, understand, consider, and share information and ideas through speaking, listening, and interacting with others. For example, we use this skill to listen to instructions, serve customers, and discuss ideas.

Creativity and innovation

Your ability to imagine, develop, express, encourage, and apply ideas in ways that are novel, unexpected, or challenge existing methods and norms. For example, we use this skill to discover better ways of doing things, develop new products, and deliver services in a new way.

Digital

Your ability to use digital technology and tools to find, manage, apply, create and share information and content. For example, we use this skill to create spreadsheets, safely use social media, and securely make online purchases.

Numeracy

Your ability to find, understand, use, and report mathematical information presented through words, numbers, symbols, and graphics. For example, we use this skill to perform calculations, manage budgets, analyze and model data and make estimations.

Problem solving

Your ability to identify, analyze, propose solutions, and make decisions. Problem solving helps you to address issues, monitor success, and learn from the experience. For example, we use this skill to make hiring decisions, select courses of action, and troubleshoot technical failures.

Reading

Your ability to find, understand, and use information presented through words, symbols, and images. For example, we use this skill to locate information on forms and drawings, and to read items such as emails, reports, news articles, blog posts and instructions.

Writing

Your ability to share information using written words, symbols, and images. For example, we use this skill to fill out forms and applications, and write emails, reports and social media posts.
