

# Hosting

The right hosting for your new website is *vital*. You need a first-class reliable service and you also need fast and efficient customer support.

*(If you have hosting already and you are satisfied with it, you can ignore this advice).*

The service I recommend is the one I've been using exclusively for over 4 years. It's low cost, has everything you need and support is second to none, always at hand 24/7 via live chat or ticket. It's also worldwide.

The plan I recommend is the **'Grow Big' plan**. This plan is suitable for growing your website to 25,000 visitors a month, which is enough to begin with (you can upgrade to a bigger package any time). It's also suitable for hosting multiple websites.

Additionally, the Grow Big plan gives you priority support over the 'Basic Plan'.
