Module 10 - Activity 1: Thinking About the Future

Time: 10 to 15 Minutes

Before you begin this module, take out your notebook and write down the following headings: investors/traders, buyers, developers, miners and legislators.

Under each heading write down what you think the future holds for each type of individual who interacts with cryptocurrency.

As you go through the module, make notes and corrections where applicable, to see how accurate your estimations were.
