Paid software

Camtasia <https://www.techsmith.com/video-editor.html>

Filming

There are lots of apps for Android or IOS that let you record great videos. Many of them are free or if not, just a few \$'s. Try some out and see which one works the best for you.

If you want to invest in a camcorder, here's the wiki review page:

<https://wiki.ezvid.com/best-camcorders>

Audio

Built in mics sometimes produce a tinny sound or an echo. If you are experiencing this problem, one good and reasonably priced mic I can recommend, is the Blue Snowball Ice. Costs around \$50 in the US, but a bit more when buying from other countries.

Music

Totally free music to use in your videos
