

REGISTERING FOR SAS STUDIO/SAS ONDEMAND FOR ACADEMICS AND UPLOADING DATASETS

Note: I would suggest this software for most students, especially those from the US. Students have said that they have had issues getting a license from WPS or that it has taken too long. Thanks.

I have made a video available on my Website and YouTube (below) that illustrates visually how to go about registering for, using, and uploading datasets to SAS Studio/SAS OnDemand for Academics.

This includes how to **register for**, where to *sign in*, **how to upload the datasets from the previous lecture**, and how to **run code**.

Register and Use SAS Studio/SAS OnDemand Link #1
