

Activity 14: Problem Solving

Time: 10 to 15 Minutes

Examine the list you made in Activity 1. Focus on the areas of strength you identified. After you have learned more about the supply chain process, is there anything you would improve? Next, take a look at the areas of weakness you identified earlier, and think about ways to address those concerns. Write down two or three paragraphs identifying the ideal solution and briefly covering the way you would implement it in your own warehouse.
