

Activity 1

Estimated time: 10 minutes

Imagine that you work for Highways England and are part of the planning team. What information would you require to be able to plan for future need?

Where might you find this information and how would you use it?

Activity 2

Estimated time: 10 minutes

Capacity, or lack of, is the major issue facing the rail network. Whilst building extra capacity seems the obvious option, doing so can present a number of challenges, particularly in cities.

What do you think these challenges may be and what methods could be used to deal with these?
