

HORIZONTAL or VERTICAL

ASSIGNMENT

HORIZONTAL OR VERTICAL ASSIGNMENT

Every scene and situation is different.

It's best to always look through your viewfinder. My best advice is for you to forget the existence of the LCD screen on your camera.

Capture a photo both horizontally and vertically.

Yes, take both and see firsthand what works best.

Find a subject.

Maybe a Person or a Pet.

Make a portrait (vertical) oriented photograph. Then take a landscape (horizontal) oriented photograph.

Two photos you will take. But remember, if you want to master photo composition, the more you practice the better your photographs will become.
